The Office Action objects to the drawings under 37 CFR §1.83(a) as failing to show every feature of the invention specified in the claims. Specifically, the Office Action notes that the signal processing means is not illustrated in the drawings as originally filed.

The Office Action also notes that the present specification in its current form fails to conform with the preferred format for U.S. patent applications. Specifically, the usual headings and subheadings do not appear in the specification.

Accordingly, applicants have amended the specification as necessary to insert the appropriate headings and subheadings. As such, the specification is believed now to be in proper form.
